ELECTRICAL SAFETY

- Do not expose heated jacket to rain or wet conditions. Water will increase the risk of electric shock.

POWER TOOL USE AND CARE

- Do not use the heated jacket if the power button does not turn it on and off. Any heated jacket that cannot be controlled with the power button is dangerous and must be repaired.
- Disconnect the battery pack from the heated jacket before storing. Such preventive safety measures reduce the risk of starting the heated jacket accidentally.

BATTERY TOOL USE AND CARE

- Recharge only with the charger specified by the manufacturer. A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- Use heated jacket only with specifically designed battery packs. Use of any other battery packs may create a risk of injury and fire.
- When battery pack is not in use, keep it away from other metal objects like paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.

- Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. Liquid ejected from the battery may cause irritation or burns.
